

## "Have A Little Faith" Son Mieux

When you're spinning round in circles  
When you barely see the sun  
When you're walking on a tightrope, blindly  
And you're trying to hold on

Have a little faith, you'll see  
It's alright  
Take a little time to breathe  
The tide turns eventually  
It comes in it goes out  
If you're ever in doubt  
Just have a little faith

When you're worried 'bout the future  
When you're living in the past  
When the present is a hazy daydream  
And you find it hard to grasp

Have a little faith, you'll see  
It's alright  
Take a little time to breathe  
The tide turns eventually  
It comes in it goes out  
If you're ever in doubt  
Just have a little faith

Wherever you are tonight  
Know that I'll be right here by your side  
Wherever you are tonight  
If you're lost then raise your light  
It might be hard to find  
But there's a spark inside  
But there's a spark inside

Just have a little faith, you'll see  
It's alright  
Take a little time to breathe  
The tide turns eventually  
It comes in it goes out  
If you're ever in doubt  
Just have a little faith

Just have a little faith  
Just have a little faith  
It comes in it goes out

If you're ever in doubt  
Just have a little faith  
Just have a little faith
